JOB OPPORTUNITY

JOB:

Staff Engineer

Nestle Purina PetCare Company
Department: Engineering - NPPC
Location: Mechanicsburg PA
Job Number: nest-00008338

POSITION SUMMARY:

Primary responsibilities include the design, estimation, and execution of plant capital projects. Projects require attention to mechanical, electrical, industrial, and safety design. Additional key responsibilities include the investigation and resolution to existing plant operational issues

PRIMARY RESPONSIBILITIES:

1. Investigation into existing opportunities in plant operations.
2. Initiative of plant capital projects including design, estimation, justification, and project submission for approval.
3. Execution of approved capital projects including purchasing, cost control, installation plan, and start-up.
4. Supervision of contractors, as required for projects.
5. Assistance in development of annual capital budget.
6. Daily interaction with maintenance team leaders to provide engineering assistance to them, as needed.
7. Provide backup support to the Manager of Engineering, as required.
8. Provide training for all new installations that he/she is responsible for.
9. Perform all other duties as assigned.

OTHER DUTIES AND RESPONSIBILITIES:

1. Promote safety by installing safety - focused designs and by stressing safety during supervision.
2. Maintain good working relationships with all plant employees.
3. Attention to detail in all aspects of project work.

BASIC QUALIFICATIONS:

Education:
Minimum 4-year B.S. degree in Engineering

Experience:
Minimum of one year manufacturing engineering experience.

Skills:
Good oral and written communication skills.
